Eli II™

1503/110WA SMALL VENUE PORTABLE LINE ARRAY SYSTEM

PRELIMINARY SPECIFICATION

Pushing the limits of new proprietary driver technology and advanced computer engineering, A-Line Acoustics introduces the 1503/110WA Small Venue Portable Line Array System. 15 proprietary 3" neodymium full range speakers are loaded into a sealed cabinet for fast midrange transient and maximum power handling. The newly designed 3" speakers get the mid-band right for clear light music and speech programs. Using Bang & Olufsen ICEpower™ technology with onboard DSP, the two 1503s delivers pristine midrange and highs with optimum efficiency, while the powered 110WA and unpowered 110X provide low frequency augmentation and amplification for the 1503s. The trim line and two cabinet design allow for sleek, clean looking set ups.

Up to two 1503s can be used in reverberant environments for excellent pattern control down to 150 Hz. vertically. Longer, custom designed arrays can be built with larger amplifiers. Please contact us with your requirements.

Made in the USA with the highest-grade components, A-Line enclosures are constructed in Baltic birch plywood. Mounting brackets are available.

Lower Right photo shows the wiring for the two woofers and wiring up to the two 1503s. Signal input and AC connection to the left.

SPECIFICATIONS	1503/110WASYSTEM
Power (Watts RMS)	200/200 @ 4 Ohms
Amplifier w/ DSP	B&O ICEpower
Impedance	4 Ohms High / 4 Ohms Low
Max SPL *	3' 107dB / 6' 104dB / 12' 101dB
Freq. Resp.	60-16kHz+6 300Hz-4K -1+2
Drivers	15 x 3" Highs / 2 x 10" Lows
Connectors	M&F XLR, I/O Powercon
HxWxD (in.)	1503 49 "x 4 "x 6" / 110WA 17 1/2" x 13" x 17 1/2"
Wt (lbs.)	1503 23 Lbs / 110A 33 Lbs /110X 30 Lbs
