LS215A Powered Subwoofer

Pushing the limits of new proprietary driver technology and advanced computer engineering, **A-Line Acoustics** introduces the **LS215A** subwoofer enclosure. Two proprietary 15" drivers are loaded in separate, sealed chambers for maximum output. The newly designed 15" drivers, with longer excursion, will move as much volume of air as most 18" drivers producing tighter lower frequencies. Mated with proven Bang & Olufsen ICEpower™ technology with onboard DSP, the LS215A delivers solid lows with optimum efficiency. The low profile design and built-in tilt back wheels make enclosure easily transportable. The space-saving design makes loading, storing and transporting enclosures much easier and very Truck-Pack Friendly! Packed horizontally three to a wheel board and secured with two heavy duty ratchet straps.

Made in the USA
with the highest-grade components,
A`Line enclosures

are constructed in DuraTex coated birch plywood with eight integrated routed handles

Tilt-back wheels for easy maneuvering

SPECIFICATIONS	LS215A Subwoofer
Power (Watts)	1000
Amplifier w/ DSP	B&O ICEpower
Impedance	4 Ohms
Sensitivity	98dB
Max SPL	128dB
Freq. Resp.	40-200Hz
LF Drivers	2 x 15" Proprietary
Connectors	M&F XLR, I/O Powercon
HxWxD (in.)	40 x 19.25 x 19
Wt (lbs.)	149

MADE IN USA
